

IKARUS

threat.detection.center

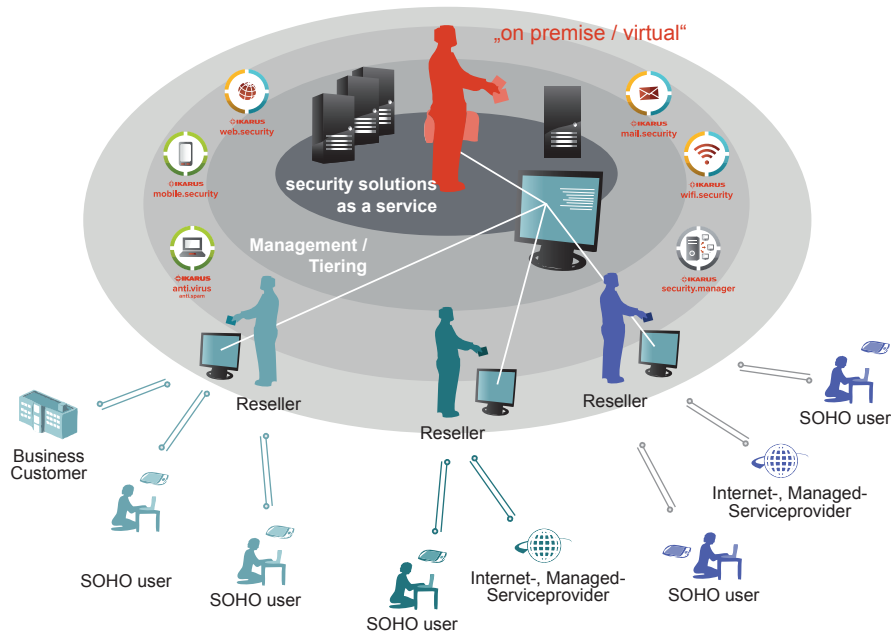

Managed Security Software Provider/

Threat Detection Center

e-mail, web, wifi, mobile

Enterprise/Distributor/MSSP*

* Managed Security Software Provider

Advantages

- » Minimal CAPEX and OPEX investment
- » Straight forward integration into existing systems
- » 24/7 availability and monitoring of the IKARUS platform - supported by a fail-safe multi-redundancy system
- » Immediate business opportunities, access and utilisation of the existing systems from IKARUS or ISP (IaaS or PaaS) and resale as SaaS
- » Governed under Austrian law, where privacy laws are very strict. As an Austrian company we are not obliged to share information with national or foreign authorities
- » Multilevel admin interface supports the managed service
- » business model for partners and MSPs to independently manage their clients
- » Scalable environment - can handle any number of users, from SOHO to large enterprise
- » Third level support and maintenance from senior IKARUS technicians
- » Multi language ready - simple process to add extra languages
- » Fully independent rebranding capabilities
- » Flexible access rights can be given by the admin interface
- » Billing and provisioning integration
- » flexible licensing models

DATA SHEET

IKARUS cloud.security as Shared Service Center/ Managed Security Service Plattform

threat.detection.center

The complete product range of IKARUS cloud.security is available via the IKARUS Scan Center. In the Scan Center, we pay attention to the best synergy between powerful hardware, stable software, good air-conditioning and a high-availability power supply and thereby offer you complete all-round protection. The platform itself is supported 24/7. All the hardware and software is state of the art and there is an update of all the databases several times a day.

You have the possibility to purchase the services of the IKARUS Scan Center via our IKARUS cloud.security. However, it is also possible to set-up your own Scan Center and use the service locally on-site.

With your own Scan Center, you have the availability of the services in your own hands and enjoy many benefits from IKARUS: special training courses for your help desk, 2nd level support, enhanced analysis support, and support for defined error classes. Additionally with the Threat Detection Center and your private cloud, IKARUS takes care of the maintainance so you can focus on your business.

Use it yourself & resell it!

Possibilities

- » Fully independent operations: sale, resale, managing, configuring, licensing, provisioning
- » Full independent rebranding capability for your dedicated solution, your resellers and MSP partners and your clients
- » Flexible business model options:
 - » Infrastructure as a Service (IaaS)
 - » Plattform as a Service (PaaS)
 - » Software as a Service (SaaS)
- » Products can be used in the own company
- » Products can be sold seperatly
- » Using the products via the intuitive web interface
- » Reseller/ISPs/Customers can reuse it as their own Threat Detection Center
- » Enabling distribution partners/MSPs to resale and manage their clients with optional rebranding
