The Company

Unwired Networks GmbH

Unwired Networks GmbH plans, executes and maintains public Wi-Fi networks in outdoor areas, ski resorts as well as indoor areas such as conferences and events. Using specialized software provided by Unwired Networks you are provided with marketing information such as user statistics and information.

The solution

IKARUS wifi.security GS

IKARUS wifi.security provides protection and security in Wi-Fi environments for operators and guests. It enables secure web browsing, customizable landing pages and highly definable configurations. As an IKARUS gateway.security solution the software is locally installed and fully managed by Unwired Networks.

Common customers

gateway.security

IKARUS wifi.security GS is excellent!

mail.security

wifi.security

"A proxy is especially needed in order to block undesirable websites." Mag. Alexander Szlezak, CEO. Unwired Networks decided to provide free Wi-Fi access in the public indoor- and outdoor areas around Ski Amadé. This was made possible with the easily installed access points which allows all users to gain access to the internet. As a result the company is able to gather user statistics and information as well as provide a valuable service to the guests.

As a user-conscious company, the security of themselves, their users and their devices, Unwired Networks trusts in IKARUS Security Software. Using IKARUS wifi.security they can restrict and filter access to the internet, which can be regulated with a URL filter, blocking all kinds of viruses and malware and utilising the award-winning IKARUS T3 Scan Engine. The product perfectly complements the solution that is being offered by Unwired Networks, due to its simplicity and swift compatibility.

Unwired Networks CEO Alexander Szlezak holds the cooperation with IKARUS Security Software in high regards: "IKARUS is very flexible and supportive partner in all projects. Likewise, it is exciting to implement new innovations and technology with IKARUS.

Unwired Networks GmbH

Wide covering, safe Wi-Fi for cities, regions, institutions, tourists associations, individual organizers or companies.
