

IKARUS
mobile.security

Security for ANDROID devices

IKARUS mobile.security is the award-winning anti-virus solution for Android devices. It proactively protects your smartphone or tablet from malware in apps and from the Internet. Using exclusively our own self-developed technology we are proud to offer a comprehensive solution for your security needs.

Find and remove all kind of malware with no noticeable impact on your battery-life or memory usage. With a paid license, you activate the full security feature set, including theft protection, web filtering and SMS blacklisting.

- » SIM-card protection*: Automatic locking if the SIM card is changed
- » USSD blocker protects against malicious USSD codes
- » URL Filter*: Protection from malware and all other Internet threats
- » Optional administrable via IKARUS cloud.security

*Requires a full license.

IKARUS mobile.security in Detail

IKARUS mobile.security protects your device and your data reliably and efficiently with daily updates and definable scan intervals.

Additionally, the protection feature surveys all newly installed or updated apps, activities on the internet, and the USSD blocker prevents the automatic execution of potentially dangerous USSD codes.

In the event that your device is lost or stolen, the full version offers theft-protection functionality, which is

operated via SMS commands. Additionally, the device is automatically locked if the SIM card is changed.

The SMS blacklist protects the user from unwanted SMS messages, with optional auto replies.

The app is available in German English, Italian and Russian.

System requirements

- » Android phone or tablet
- » Android version 4.0 or higher

Secure Android mobilephones and tablets!

Three simple steps to your FREE TRIAL VERSION

- 1 Visit our trials page: www.ikarussecurity.com/trials and choose a product.
