Ongoing Optimization and Maintenance of Your Guardian Sensors

Annual subscription for continuous service delivery

Benefit from our extensive experience and expertise with Nozomi Networks solutions: We provide ongoing guidance and consulting to help you seamlessly integrate and operate the latest security practices and insights within your existing security systems and processes.

With the **IKARUS Optimization Package**, the IKARUS OT Security expert team takes full responsibility for the ongoing optimization and maintenance of your **Guardian OT security sensors**. As a **full-service offering**, this package includes comprehensive Guardian support with secure remote access.

The goal of this annual subscription is to continuously enhance the performance and security of your systems, ensuring full compliance with the latest security standards and regulations, such as **NIS2**, **IEC 62443**, and **ISO 27001**.

Services included in the IKARUS Optimization Package

- ✓ **Ongoing Asset Database Cleanup**: Regular review and cleanup of asset databases to ensure accurate data and efficient system performance.

- ✓ **Continuous Guardian updates and patches**: Automated deployment of the latest software updates and security patches to maintain system integrity and protection.

- ✓ **Configuration of new Guardian features**: Implementation and customization of new features as they become available to enhance system efficiency and security.

- ✓ **Ongoing integration and adjustment of external solutions for Guardian**: Seamless integration and fine-tuning of external security tools and solutions to support a comprehensive security architecture.

- ✓ **Continuous Optimization of Alert Rules**: Ongoing review and adjustment of alert configurations to minimize false positives and improve incident response capabilities.
