WHAT WE DO >>>>

The HarfangLab EDR is a cybersecurity solution composed of agents strategically placed on endpoints, be it desktops or servers.

These agents **seamlessly communicate with a centralized manager**, orchestrating robust and real time cyber defense capabilities.

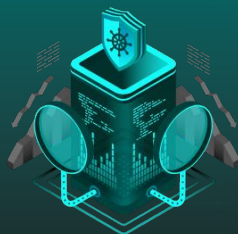

»»»» OUR PROMISES ««««

Getting the best cyber expertise

HarfangLab cyber knowledge is based on excellence thanks to a powerful Cyber research & Threat Intelligence team serving our clients.

Building trust through transparency

Trust is not granted; it has to be built. We provide a transparent and open environment as all the detection rules are fully available.

Adapting to diverse business needs

No two infrastructures are alike, and HarfangLab follows the needs of its customers, adapting to the requirements of their environments: OS versions, deployment sites (Private or Cloud).

Bringing a seamless experience

Supporting the security of your operations without causing slowdowns or interference is our priority. We focus on the ease of installation and optimization of your resources.

»»»» APPROVED BY ««««

«A real pleasure to work with HarfangLab. We deployed in a few weeks, including on our production environments and databases. The tool also identified and cleaned some malware not detected by traditional antivirus tools. In short, we love HarfangLab and we are proud to support french expertise! »

Antonin Garcia.
